### **Partnership Announced between Connect Tech and Basler Supporting Machine Vision with Embedded Hardware**

**Guelph, ON, December 13, 2016** – With the incredibly fast paced growth of embedded vision systems, Connect Tech is excited to announce its partnership with Basler, a technology leader with over 25 years of vision experience. This partnership will ensure joint customers of Basler vision devices along with Connect Tech embedded GPU hardware platforms are guaranteed the support they need to quickly develop and deploy their embedded vision systems.

Embedded vision applications are a perfect target for GPU processing. The combination of a Basler embedded camera paired with one of the many embedded NVIDIA® GPU solutions from Connect Tech will ease the design process. Connect Tech's embedded solutions enable vision standards such as GigE Vision and USB3 Vision when paired with Basler's embedded cameras and accessories.

Connect Tech NVIDIA® Jetson™ TX1 solutions along with Connect Tech NVIDIA® GTX 950 and higher series products are ideal embedded platforms for machine learning associated with the images captured by a Basler camera module. "We find that one of the most frequent questions we get when supporting our GPU audience is with respect to cameras," states David Worthen, president and co-founder at Connect Tech. "This partnership represents our commitment to ensuring quality, compatible hardware solutions that are readily available off the shelf or customized."

#### **About Connect Tech Inc.:**

For over 30 years, Connect Tech (CTI) has built a solid reputation for expertise in providing professional design services, delivering unsurpassed technical support and developing innovative products for embedded applications. CTI's products include commercial off-the-shelf and modified solutions for COM Express®, Qseven, SMARC Carriers, Single Board Computers, GPU/GPGPU solutions, Rugged Tablets, Cellular/Satellite M2M, FPGA, Digital & Analog I/O, Power Supplies, Enclosures, CAN Controllers, Solid State Drives, Ethernet-to-Serial, Multi-port Serial Cards, Adapters & Development Tools. #### **About Basler:**

Basler is a global manufacturer of premium quality digital cameras for a wide range of industrial applications. As a publicly traded company with headquarters in Ahrensburg, Germany (part of the greater Hamburg metropolitan area) Basler is a leader in the world market of vision technology, with multiple subsidiaries and representative offices in Europe, the United States and Asia.

Founded in 1988, Basler has the experience, insight and manpower to lead the industry.

Manufacturers of equipment, machines, and plants incorporate Basler cameras into their own products. Basler cameras are predominantly used in industrial mass production, medical technology, the life sciences, retail applications, as well as in intelligent traffic systems.
