## PCI/104-Express to PCI Express Adapter

Connect Tech's PCI/104-Express to PCI Express adapter enables users to install any x1, x4, x8 or x16 lane PCI Express card in a PCI/104-Express stack.

This convenient adapter board enables testing and development for standard PCI Express cards in the PCI/104-Express environment.

This adapter offers full industrial temperature range operation.

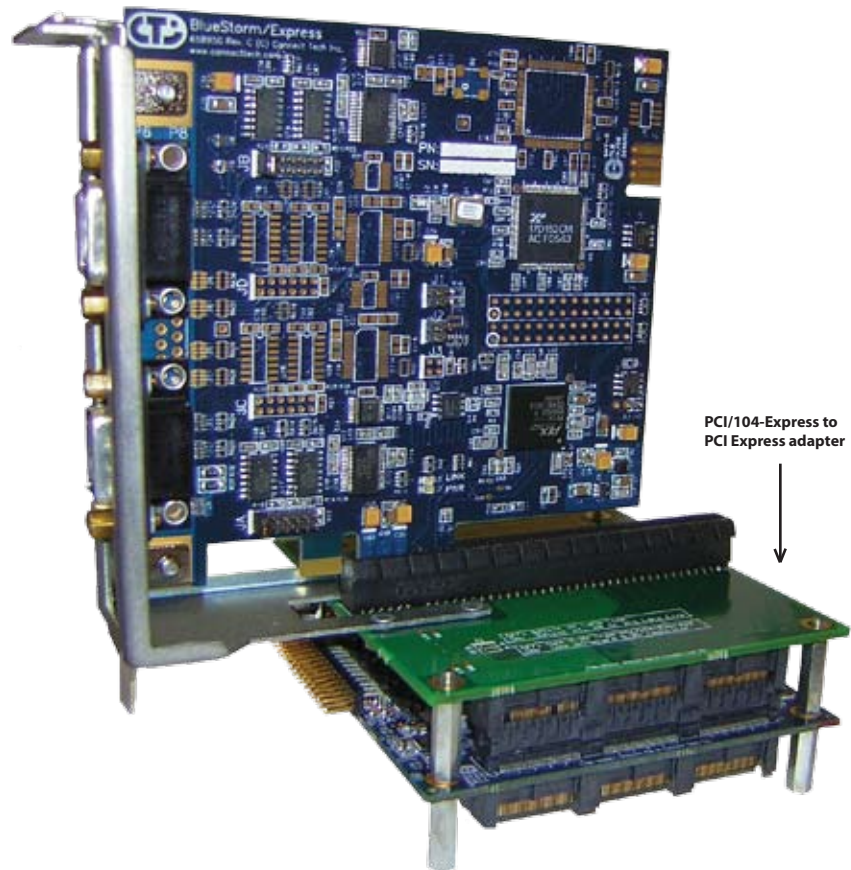

### Specifications

- PCIe/104 and PCI/104-Express compatible
- Industrial temperature range of -40° C to 85° C
- Optional PCI-104 120 pin stack-through connector
- PCIe/104 156 pin bottom connector
- x16 vertical PCI Express card edge connector (fits x1, x4, x8 or x16 lane cards)
- Custom support bracket to ensure PCIe card stability
- RoHS compliant

### Standard Usage

This adapter supports any x1, x4, x8 or x16 lane PCI Express add-in card. Simply mount the add-in card to the adapter and install the adapter on the top of a PCI/104-Express stack.

Once everything is connected, you may begin using the add-in card just as you would any other PCI/104-Express add-in card. No additional configuration is required.

**Easily integrate PCIe cards into your PCI/104-Express stack.**

*Image above shows a x1 PCI Express card installed in Connect Tech's PCI/104-Express to PCI Express adapter.*
