FOR IMMEDIATE RELEASE

Connect Tech Introduces RoadWarrior, the Company's First Cellular I/O Product for Remote and Mobile Applications

TORONTO, ONTARIO – May 2, 2011 – Connect Tech Inc., a leader in delivering connectivity solutions for embedded and industrial technology applications, is pleased to announce the availability of its first Cellular I/O product, the RoadWarrior.

The RoadWarrior enables remote monitoring, controlling and collecting of data from multiple I/O interfaces through a wireless cellular data link or Low Earth Orbit (LEO) satellite. It can be configured to operate on any of today's existing cellular network standard and frequency bands, with convenient drop-in upgradeability to operate on future cellular networks. With a wide range of interfaces (RS-232, RS-485, CAN, GPS, Bi-dir GPIO, High Voltage GPIO and ADC's) the RoadWarrior can be controlled by most devices with Internet connectivity.

This product is designed for rugged mobile, mission-critical and industrial strength applications that require enhanced wireless M2M (machine-to-machine) connectivity and is ideal for many remote or mobile application environments including transportation and military applications.

RoadWarrior– Features

- Remotely monitor, control and collect data from multiple I/O interfaces
- Operate on any cellular or Low Earth Orbit (LEO) network
- Control the RoadWarrior with any Internet connected device
- RS-232, RS-485, CAN, GPS, Bi-direction GPIO, High Voltage GPIO and ADCs

About Connect Tech Inc.

Connect Tech Inc. delivers high performance connectivity solutions for embedded and industrial technology applications. For 25 years, Connect Tech Inc. has built a solid reputation for expertise in providing professional design services, delivering unsurpassed technical support and developing innovative products that improve design efficiency and cost effectiveness. Connect Tech products include commercial off-the-shelf solutions for PC/104, PC/104-Plus, PCI/104-Express, FeaturePak, Qseven, PCI, PCI Express, Ethernet, CompactPCI and ISA, including FPGA, digital I/O, single board computers, CAN controller cards, solid state drives, Ethernet-to-serial devices, wireless radio modems, and multi-port serial cards.

For specialized requirements, Connect Tech offers modified COTS solutions to create an exact technology fit, shorten the design cycle, and reduce development costs. Our products are installed in

a wide range of operating system environments and accompanied by a Lifetime Warranty and free Technical Support. Headquartered in Guelph, Ontario, Canada, our customers include energy, military, manufacturing, transportation, automation, point-of-sale and other users of embedded technology.
